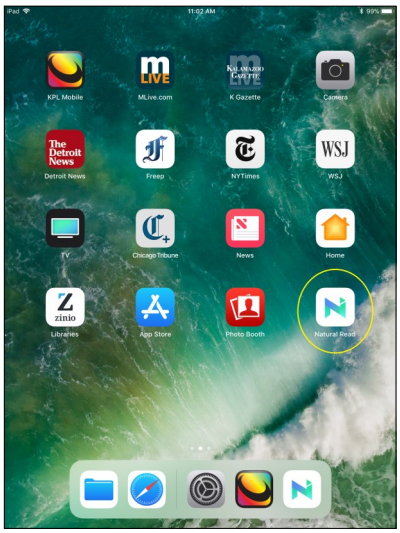
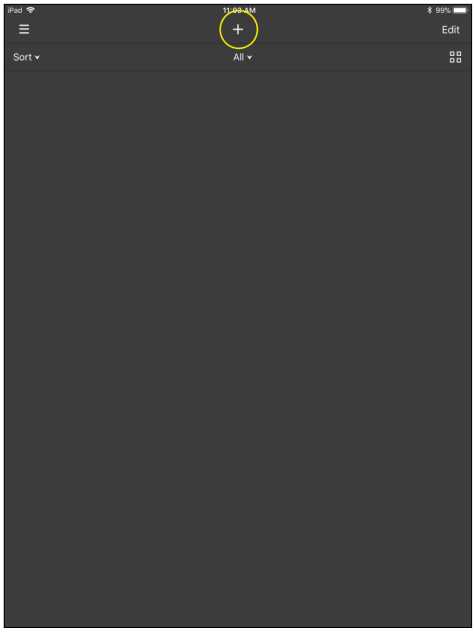
NaturalReader

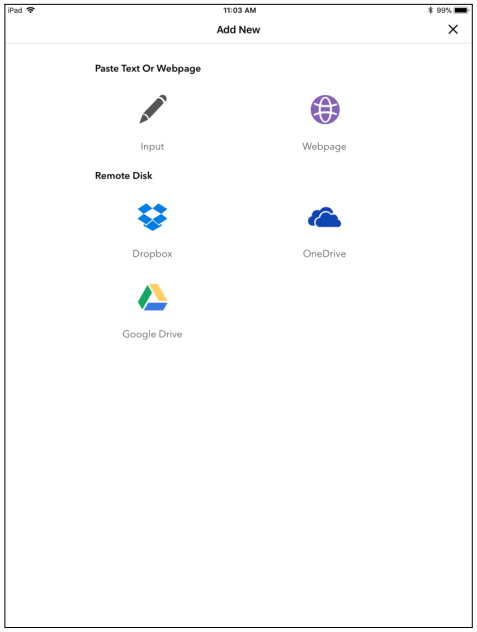
NaturalReader is a text-to-speech app that reads webpages, documents, and eBooks aloud to you with quality, natural-sounding voices.

1. Launch the app by selecting the NaturalReader icon located on the bottom right of the home screen.



2. Tap the + symbol located at the top of the screen to open a new webpage or document.

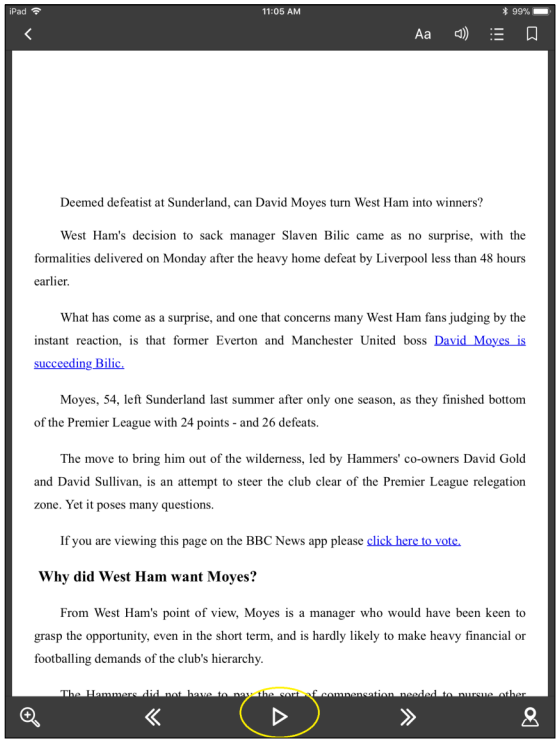




3. To have NaturalReader begin reading a website, tap on the purple webpage icon.

4. Enter the URL of the website you are trying to reach.

- To start reading the website tap on the Listen Now button on the bottom right



NaturalReader will read the entire website after pressing play. You can also select specific lines of text to be read simply by tapping on the paragraphs.
